News No. 13/2017

Supplier change for the Output filters of Franklin Electric High Efficiency Systems

Franklin Electric's commitment to quality and availability has the target to provide customers with defect-free products at any time and thus permanently evaluates and incorporates new technologies and components into existing products in the course of the Continuous Improvement Program.

To prevent potential future delivery shortages or quality issues Franklin Electric has changed the supplier of the output filter for the High Efficiency Systems. The former supplier has been taken over by a large organization, which has changed its focus to different product lines. Under these circumstances, Franklin Electric can't secure the future availability and decided to cooperate with an alternative, more secure source for this output filter.

PERFORMANCE

There is no change in the performance

MODEL NUMBERS

The product and system model numbers remain unchanged.

DIMENSIONS

The dimensions and weights have slightly changed (especially on the IP54 versions). Please see details in the attachments to this News.

Please do not hesitate to contact your Franklin Electric Area Sales Manager or Field Service Engineer for additional information.
