

ENVIRONMENTAL POLICY

Management of Franklin Electric s.r.o. declares with this document its decision to mitigate the impact of own activities and services on the environment. By introducing and maintaining an environmental management system according to the international standard ČSN EN ISO 14001, the company management announces its following environmental policy:

- We comply with valid legislation and other environmental requirements.
- We improve the performance of the environmental management system by looking for suitable opportunities,
- We want to economically treat the raw materials and energy (compressed air, electricity and water)
- We prevent waste generation, we consistently sorting, gathering in designated containers and prevent any possible leakage and consequent threat to the environment as much as possible.
- We want to promote our employees' and our partners' awareness of responsibility for a healthy environment
- We ensure compliance with these principles through regular inspections
