## New connection kits for the cable extension

Franklin Electric is adapting its connection kits for cable extensions considering changing market requirements and the voice of customer and is now offering four kits with cable connection sleeves for cable cross-sections up to 95 mm<sup>2</sup>. In this way, Franklin Electric wants to reduce unnecessary waste. However, this action does not only benefit the environment, but also reduces the price.

The following connection kits are available from now:

Model number	Description	for cross-sections up to [mm <sup>2</sup> ]	L [mm]	Ø [mm]	H [mm]	Max. cable Ø [mm]
308 090 930	Splicing Kit 10	4 – 10	190	36	50	26
308 090 931	Splicing Kit 25	10 – 25	260	47	63	34
308 090 932	Splicing Kit 50	25 – 50	360	55	75	43
308 090 933	Splicing Kit 95	50 - 95	400	70	95	48

The new connection kits are suitable for all common cable materials, meet all requirements in terms of durability and offer high electrical insulation values and mechanical strength. As usual, assembly also remains quick and easy.

### COMPONENTS

- Transparent plastic shell
- Ready-to-mix cast resin
- insulation tape
- Assembly instruction

The new kits no longer contain crimp connectors.

The existing splice kit 308 090 921 (incl. 5 sets of crimp connectors) will be successively replaced by the new kit 308 090 930.

Ordering information can be found in the product catalog, available at [franklinwater.eu](http://franklinwater.eu).
