

September 2021

All 8" encapsulated submersible motors now equipped as standard with the exclusive Sand Fighter® Sealing System of Franklin Electric

All 8" encapsulated submersible motors now feature Franklin Electric's proven SandFighter® sealing system with SiC/SiC mechanical seal and sand protection as standard. The changeover for these motors will occur with the 2021 production date.

The technology is thus integrated as standard in all 6" to 12" Franklin Electric submersible motors.

Sand Fighter® Sealing System

The technology enables smooth operation in applications with higher levels of sand.

For more information about our motors, please visit our website franklinwater.eu.
