Optimizing of the packaging for the 6" encapsulated motors

Dear customers,

to optimize the handling and shipment of the 6" encapsulated motors, we have optimized the packaging concept of the motors. The motor packaging has been complemented with a single wooden pallet. This will change the height of the package by 136 mm. The width and length of the packaging are the same as before.

This improvement will facilitate the transport, handling and storage logistics of the motors, particularly in the case of heavy motor weights.

Packaging design

This is a running change since Q3/2021.

Please do not hesitate to contact your Franklin Electric contact for additional information.
