EV-R type: vertical multistage pumps top/bottom ports

Franklin Electric is pleased to announce the introduction of the vertical multistage pump with overlapping ports. This special version is based on a discharge port above the suction port with a new design of the outer casing and bottom casing.

The new EV-R type allows a 50 % reduction in footprint due to a different pipe positioning in parallel instead of in-line configuration.

FEATURES

- Discharge port above the suction port
- Full Stainless steel AISI304 construction
- Range from EV 6 up to EV 20
- Pressure rating PN16

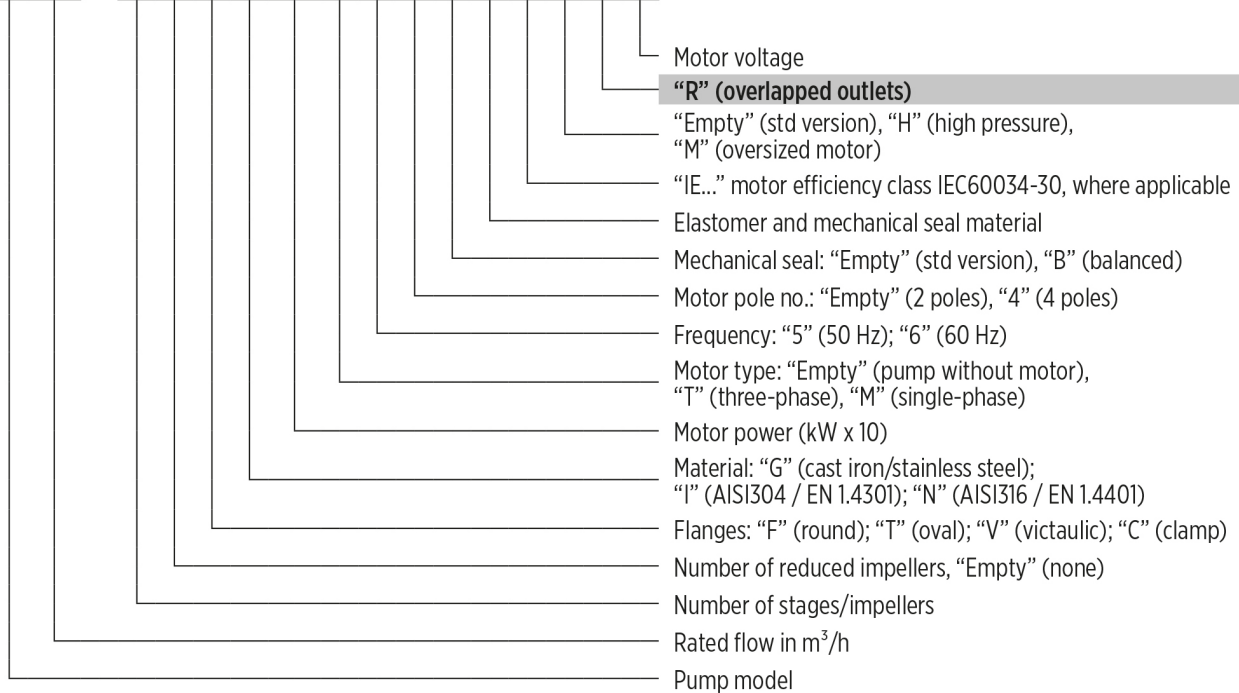

APPLICATIONS

TYPE DESCRIPTION

PUMP IDENTIFICATION CODE

EV 15 / 05 FI G 015 E1 R

AVAILABLE MODELS 50-60 Hz
