## NEW SUBMERSIBLE DRAINAGE PUMPS

**FDR Series: Franklin Dewatering Residential**

**FDP Series: Franklin Dewatering Professional**

Franklin Electric is pleased to announce the introduction of new submersible pumps for the drainage of clear and turbid waters. The electric submersible pumps are suitable for numerous applications in the residential, commercial, industrial, construction and mining sectors.

### FDR Series (Franklin Dewatering Residential)

The electric submersible pumps of the FDR series are the right solution for draining clear and turbid waters:

- Drainage and dewatering rooms or tanks
- Rainwater collection
- Extraction of water from ponds, streams or pits

### APPLICATIONS

They can be used as ready-to-use portable pumps for:

- Construction sites
- Basement wells
- Fixed installations with control panel

### IMPELLERS

Open impeller

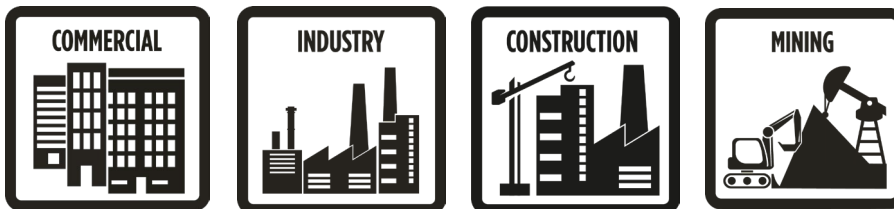

## FDP Series (Franklin Dewatering Professional)

The electric submersible pumps of the FDP series are suitable for draining clear and turbid waters:

- Construction site drainage and dewatering
- Mining, quarrying drainage and dewatering
- Emergency flood water drainage
- Rainwater collection

## APPLICATIONS

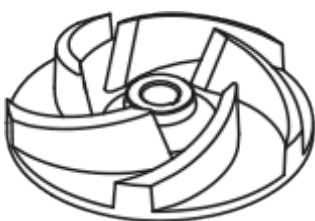

They can be used as ready-to-use portable pumps for:

- Construction sites
- Basement wells
- Fixed installations with control panel
- Pumping liquids, including abrasive ones

## IMPELLERS

- Open impeller
- Double open impeller
