INTERMEDIATE BEARING FOR HIGH PRESSURE EH PUMPS

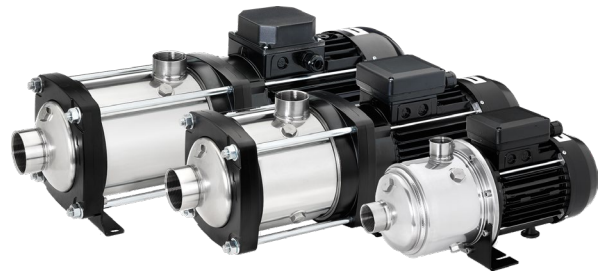

We are pleased to announce that for some models of **EH Horizontal multistage pumps**, equipped with a high number of impellers, we will introduce a **reinforced intermediate stage**.

This intermediate stage incorporates an **additional silicon carbide bearing** that allows to strength the pump structure when working in harsh conditions, typical of some industrial applications.

EH product family enriches its features becoming more and more versatile.

UPDATED MODELS

- **EH3 and EH5:** from 6 stages onwards
- **EH9:** from 5 stages onwards

Part numbers and prices of the mentioned models will not change.
New models will be available from the 1st of June 2024.

Do not hesitate to contact your Franklin Electric contact.
