

FLANGE ADAPTERS

For Wastewater Pump Retrofits

A simple adapter solution to install Franklin Electric wastewater pumps on compatible pre-existing coupling systems

Replacing a wastewater pump does not always require changing the entire installation. When the existing coupling system is already built into the pit, Franklin replacement flanges make it easier to install a Franklin wastewater pump.

Designed for retrofit and replacement projects, these adapters help reduce installation work, downtime and additional modification costs. Our technical team is available to verify system compatibility and support you in selecting the right solution.

Your advantages at a glance

Lower installation costs

- ✓ Avoid replacing the complete installation and reduce additional modification work

Easy retrofit

- ✓ Install Franklin Electric wastewater pumps on compatible existing coupling systems

Reduced downtime

- ✓ Faster pump replacement means less interruption to the system

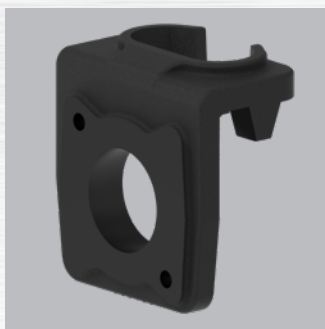

Greater flexibility

- ✓ Upgrade or replace existing pumps while keeping the current infrastructure whenever compatible

Match your FWC pump size with the corresponding retrofit adapter
